

VEERARAGAVELU G

+91 7845901645 | vijug@live.in

Senior automation professional seeking roles in Hyper automation, Solution Architecture, and Intelligent Automation, leveraging expertise in UiPath, Power Automate, AI/ML, and agentic automation to drive enterprise-scale digital transformation, targeting product-based companies.

Profile Summary

- **Senior Technology Leader with 10+ years of experience driving automation-led transformation** through Hyper automation, RPA, Power Automate, Python, and AI-driven solutions across diverse enterprise environments.
- **Specialized in solution architecture with the ability to design scalable automation ecosystems**, create high-level solution blueprints, and align end-to-end automation strategies with business objectives and ROI targets.
- **Strong expertise in agentic automation**, autonomous agent creation, and evaluation of use cases to determine suitability between traditional RPA and AI/agent-based automation for maximum efficiency and cost benefit.
- **Demonstrated leadership in Agile delivery environments**, guiding cross-functional teams, managing sprints, ensuring governance, and driving best practices in coding, reviews, documentation, and release workflows.
- **Proficient in Hyperautomation frameworks** that combine RPA, AI/ML, OCR, NLP, process mining, and analytics to build intelligent, decision-capable digital workers for enterprise operations.
- **Skilled in conducting feasibility studies, automation assessments, and ROI modeling**, enabling data-driven decision-making for tool selection, prioritization, and pipeline creation.
- **Hands-on experience integrating automation platforms** with APIs, enterprise applications, databases, cloud platforms, and orchestrators, ensuring seamless orchestration and reliable, scalable deployments.
- **Adept at implementing intelligent document processing**, cognitive automation, and ML-based enhancements to elevate automation maturity and improve accuracy, speed, and operational resilience.
- **Recognized for strong stakeholder management**, requirement shaping, and the ability to translate business challenges into actionable automation roadmaps, while mentoring teams and uplifting organizational automation capabilities.

Core Competencies

- | | | |
|---|--|---|
| • Hyper automation Strategy | • Process Optimization & Reengineering | • Cognitive Automation & Decision Intelligence |
| • Intelligent Automation Design | • Workflow Orchestration & Governance | • Stakeholder Management & Collaboration |
| • Agentic Automation & Autonomous Workflows | • Requirements Analysis & Prioritization | • Continuous Improvement & Operational Excellence |
| • Solution Architecture & Blueprinting | • Feasibility Assessment & ROI Modeling | • Change Management & Transformation Support |
| • Robotic Process Automation | • Agile Delivery Management | • Intelligent Document Processing |

Education

- **2014: Master of Computer Applications (MCA)** – St. Joseph's College of Engineering, Chennai
- **2010: Bachelor of Science (B.Sc.) in Information Technology** – EGS Pillai Arts & Science College, Nagapattinam

Technical Skills

- **RPA & Automation:** UiPath (Certified Developer & Advanced Developer), Blue Prism, Workflow Automation, Process Automation, Task Automation, Business Process Automation, Hyper automation, Bot Development, Action Center, Automation Framework, Process Orchestration, Intelligent Automation, Automation Deployment, CICD Pipelines
- **Programming & Scripting:** Python, SQL, HTML5, CSS3
- **ERP & Enterprise Tools:** Go Frugal-ERP, Tally, Salesforce, Oracle
- **Integration & APIs:** Swagger, API Integration
- **Data & Analytics:** Power BI, Kibana Dashboards, Elasticsearch
- **Machine Learning & AI:** NLP, Computer Vision using UiPath, Intelligent OCR Activities
- **Other Tools & Platforms:** Unqork, Citrix Automation

Certifications

- **UiPath Certified Developer** – UiPath
- **UiPath Advanced RPA Developer** – UiPath
- **Unqork Developer Certification** – Unqork

Work Experience

Senior Tech Lead | HCL | Nov'24 – Present

- **Agile Leadership:** Led sprint planning, backlog management, and cross-functional coordination to deliver automation solutions with predictable timelines and quality.
- **Agentic Automation:** Designed autonomous agents and decision-intelligent workflows to enhance automation depth, scalability, and business value.
- **ROI-Based Solutioning:** Performed feasibility and ROI evaluations to recommend traditional RPA, AI-driven automation, or full-stack Hyperautomation approaches.
- **Hyperautomation Architecture:** Directed end-to-end solution design across UiPath, Power Automate, Python, and AI/ML, ensuring scalable and compliant enterprise automation delivery.
- **Hands-on experience with Azure Document Intelligence, Document Understanding, IXP, and Agentic Automation**
- **Developed digital applications for the manufacturing industry using Power Apps, Dataverse, and SQL**

UiPath Developer | Nalashaa Software Solutions | Bangalore | Dec'23 – Nov'24

Domain: Healthcare

- **Automation Design & Deployment:** Designing and deploying scalable, reusable UiPath automation solutions to streamline business processes.
- **Stakeholder Collaboration:** Collaborating with stakeholders to identify automation opportunities & define functional and technical requirements.
- **Robot Development & Implementation:** Developing, testing, and implementing UiPath robots to enhance operational efficiency across multiple domains.
- **Team Guidance & Mentoring:** Guiding project teams on UiPath best practices, coding standards, and automation architecture.
- **Code Review & Optimization:** Conducting code reviews and optimizing robot performance to ensure reliability and maintainability.
- **Issue Troubleshooting:** Troubleshooting and resolving technical issues involving UiPath robots, orchestrator, and integrated systems.
- **Requirement Analysis & Architecture:** Analyzing business requirements and architecting high-level automation solutions.
- **Vendor Communication & Improvement:** Communicating with UiPath support & recommending software improvements to enhance functionality.
- **Feasibility Assessment & Documentation:** Assessing process feasibility and documenting requirements & project plans for automation initiatives.
- **Orchestrator & Task Management:** Managing orchestrator queues to efficiently execute and monitor tasks.
- **Workflow Auditing & Quality Assurance:** Auditing automation workflows post-development to ensure quality, accuracy, and scalability.

UiPath & Unqork Developer | ITC Infotech | Bangalore | Oct'22 – Dec'23

Domain: Finance & Healthcare

- **Solution Architecture:** Analyzed and interpreted business requirements to architect robust, high-level automation frameworks.
- **Vendor Coordination:** Engaged with UiPath support teams to troubleshoot software issues and implement recommended enhancements.
- **Automation Development:** Designed, built, and deployed UiPath automation solutions to streamline business processes & improve efficiency.
- **Application Support & Optimization:** Delivered continuous support and enhanced performance of deployed automation workflows.

UiPath & Unqork Developer | Conneqt Digital Business Solutions Pvt. Ltd. | Chennai | Jan'22 – Oct'22

Domain: Insurance & Accounting

- **Solution Design & Implementation:** Engineered and deployed Unqork solutions to optimize business processes and enhance application efficiency.
- **Application Development & Testing:** Led the end-to-end development and executed comprehensive testing of Unqork applications to ensure high quality and full alignment with business requirements.

RPA Developer (UiPath) | Iopex Technology Pvt. Ltd. | Chennai | May'19 – Jan'22

Domain: Insurance

- **RPA Solution Delivery:** Orchestrated end-to-end design, development, deployment, and testing of UiPath automation solutions.
- **Process Automation:** Automated invoice processing by extracting data from unstructured PDFs and integrating it into APIs using intelligent OCR, NLP, Python, Swagger, and Git.
- **Workflow Optimization:** Streamlined email-based data retrieval and Salesforce integration to enhance operational efficiency.
- **Quality Assurance:** Executed rigorous testing and debugging to ensure accuracy, reliability, and compliance of automated workflows.

RPA Developer (UiPath) | Crown Solutions Pvt. Ltd. | Chennai | Oct'18 – May'19

Domain: Insurance & HR

- **Automation Architecture:** Analyzed requirements and designed high-level UiPath automation frameworks.
- **Solution Development:** Developed and implemented RPA solutions, ensuring alignment with business processes.
- **Testing & Troubleshooting:** Led comprehensive testing and resolved technical issues to guarantee successful deployment.

RPA Developer (UiPath) | Layam Flexi Solutions | Chennai | Sep'17 – Apr'18

RPA Developer | Digital Track Pvt. Ltd. | Chennai | Jul'16 – Jul'17

- **Automation Framework Design:** Assessed business processes and designed scalable automation frameworks.
- **Process Implementation:** Automated sales orders, WhatsApp messaging, and Tally data entry for reporting efficiency.
- **API & System Integration:** Integrated APIs for seamless data exchange across applications and automated network-based processes.
- **Bot Development:** Created user-creation bots, generated incident reports via Jira, and automated firewall configuration reports.
